

## Toprope Climbing

This is our premiere class for beginning a rock climbing journey on ropes or your first time sport climbing outside. Learn all the basics of top roping. Top roping is the act of climbing while your rope is anchored above you at the top of the climb. We will cover belay device types and their proper operation, communication/commands, tying in as a climber, belaying, and how to take small falls on a climb and catch as a belayer (optional). At the end of this class, each student will have a clear understanding of all the elements of top roping on an already set up top rope. This class will consist of one full day held outside at a local Seattle area crag (most likely Exit 38 or 32 off I-90).

### Language

Certain language and cultural norms of the mainstream climbing community are not acceptable in our climbing classes. This is not an all encompassing list, nor is it here to chastise: we are all here to learn together. It takes a group effort to make an inclusive space.
